Water Resources Research

Description

This is an R Markdown document. This document reads in a query from Scopus for Water Resources Research. The document reports:

1. Number of open-access articles, number of closed articles, and total number of articles
2. Results from a Kolgomorov-Smirnov test to see if the number of citations is different for open vs closed-access articles.
3. Cumulative distributions of the two number of citations data sets (Figure1).

Requested Citation

Article Counts

Number of Articles: 4,625

Number of Open Access Articles: 3,064

Number of Closed Access Articles: 1,561

```
##  
## Two-sample Kolmogorov-Smirnov test  
##  
## data: as.numeric(dfArticlesOpenAccess$Cited.by) and as.numeric(dfArticlesNotOpen$Cited.by)  
## D = 0.23401, p-value < 2.2e-16  
## alternative hypothesis: two-sided  
  
## [1] "Different with 0.95 confidence"
```
